I AM POEM

Eric Harris
per. 6
10\30\95

I am a nice guy who hates when people open their pop can just a little.
I wonder what my soccer team will be like in the Spring.
I hear myself turning on the ignition of an F-15.
I see myself flying above everyone else.
I want to fly.
I am a nice guy who hates when people open their pop can just a little.

I pretend I am walking on the moon.
I feel that I will get straight A's again.
I touch the sky.
I worry that I will have a fire in my house.
I cry when I see or hear a dog die.
I am a nice guy who hates when people open their pop cans just a little.

I understand how to play soccer.
I say that a sport is something that you have to break a sweat in.
I dream that I am the only person on Earth.
I try to be as nice as I can.
I hope there isn't another O.J. trial.
I am a nice guy who hates when people open their pop cans just a little.

Some interesting ideas - variety!

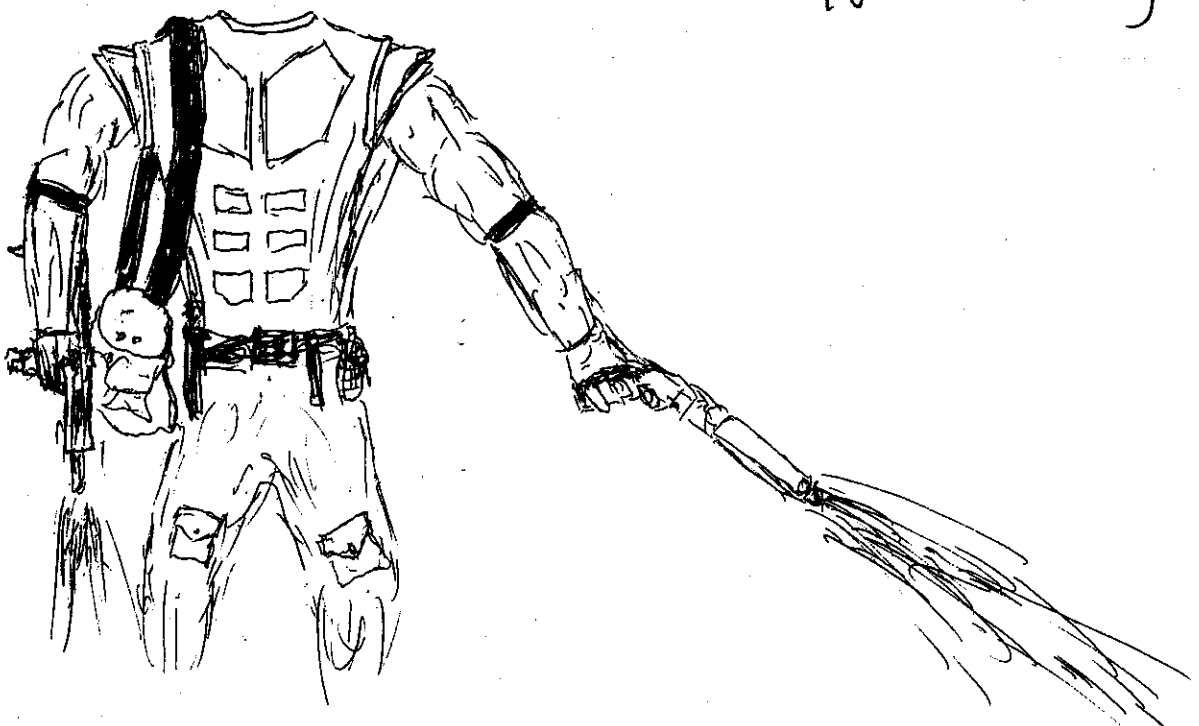
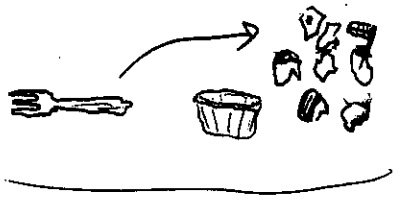
Book 2: HELL ON EARTH

Ahhhh, my favorite book. We, the gods, will have SO much fun w. NBK!! killing enemies, blowing up stuff, killing cops!! My wrath for January's incident will be godlike. Not to mention our revenge in the commons. GAHWWD sooo many people need to die. & Now, a fun look at the past: (Science-Desk style.) ((You know what I hated?!? PEOPLE!! YEAA!!))



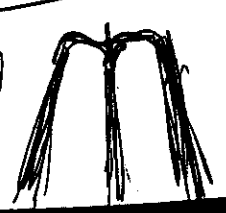


Book 3:
Infernal Sky

Mann.... lets sum up junior year - the kool shit atleast: sitting in the commons dubbing & laffing at fags. (WooD-jA!) (wanna-be) HAHAHA

frisbee fags..... orange mortars for them all the midnight bowling & pool, the KMFDM & RAMMSTEIN concerts, the RM3 when shit went off, ALL over deathmatches & quake serving. I've found that, over the years, we cant beat eachother: its equal as a nigger to a spade. watervold, EVERY year we get burnt... of course. all the amp, shit we've seen, strobe! (NIPPLE-FU!) we need to find cave girl island & enemy gold for home entertainment. Beatin the shit out a boxes, Blackjack, smokin Behind BJ, Fires, both kickass 4th's of July... it was FUCKIN BADASS!!

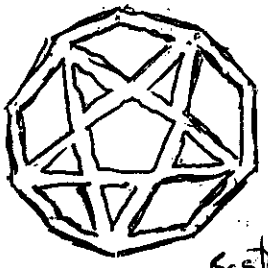
SUPA NIGGA!!



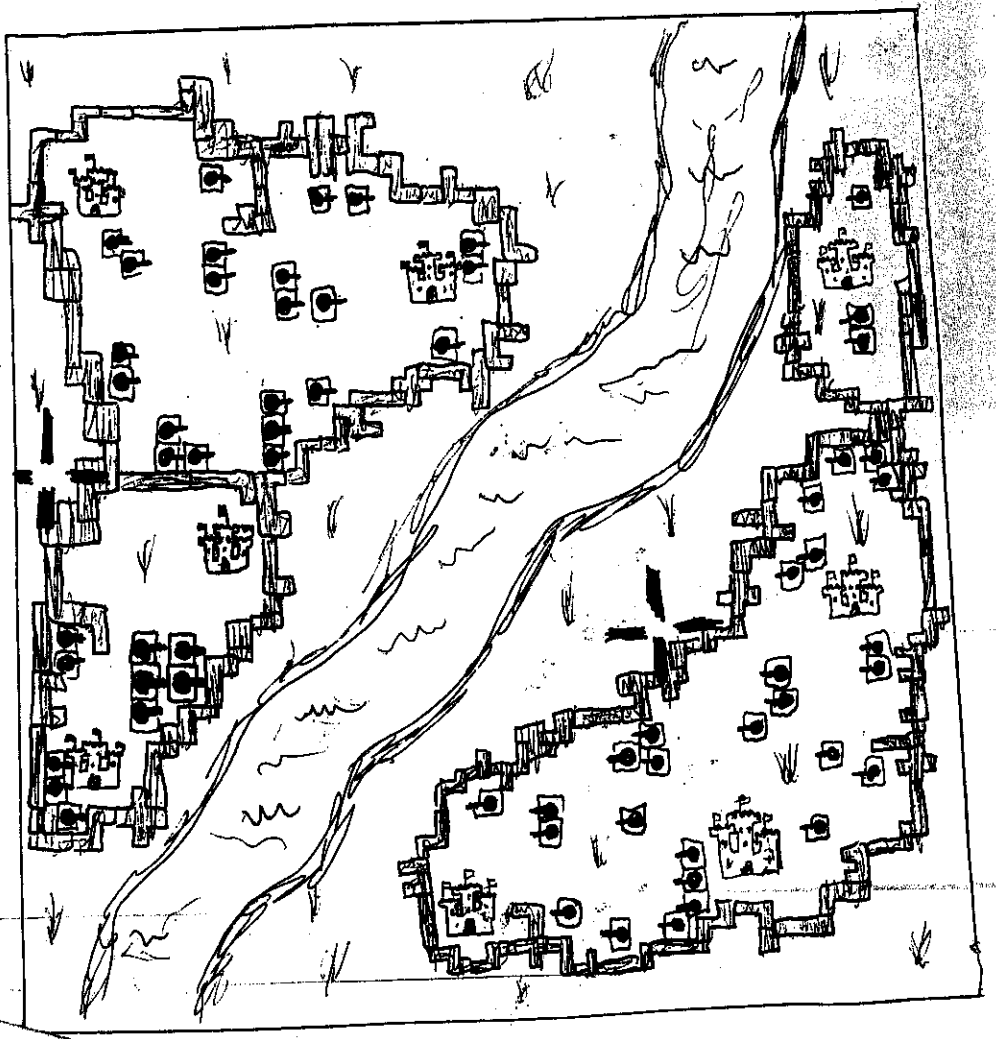
JC-001-026238

|MY Quotes|| →

- Dead people are the best companions, other than weapons.
- There are more than 99 ways to die.... & I thought of them!
- If I don't like them, then they should change, or die.
- My black blood & yer white flesh.
- To find a similarity between people & doom zombies
- Stupid people are here for my amusement.
- The reason people piss me off is to test my trigger finger, & my adrenaline.



Bastages!



Book 4 : Endgame (?...)

Last written book, more to come. I won't bore you w. advice shit you allready know. NBK will be the ultimate revenge, to our shitlists, the pigs, everyone! we'll fuckin 'Take care of business' to be sure. So, Indigo, As we near the day of fate ... AAAA FUCKIT!

just let it come. They will know when gods get pissed off,... the little pussies will feel the shotgunshells & the Bullets. Just like that little night at comm. service. They need to die soon bad.

Now they will.

>>>>>All Code Pointers in Doom v1.9<<<<<
<<<<<Figured out by Andy Shawaluk>>>>>

Additions by:

"Shadow Lord" (282, 397, 774)
Jjukil (257, 264, 282, 603, 635, 676, 718)

Notes:
Each code pointer is listed only once. The two "check line of sight" pointers are different, but with the same effect. Only one pointer has a function unknown to me. All pointers which make sounds ONLY can be used anywhere, but they may not always work. Weapon code pointers are restricted to the weapon frames, and the monster code pointers are used anywhere else. For the Mancubus firing pointers, the directions are as viewed from the mancubus, so a "left" fireball will go past you to the right if you do not move. That should clear things up.

Weapon Code Pointers:

1 - Light restore (after flash)
2 - Weapon bobbing pointer
3 - Weapon select pointer
4 - Weapon deselect pointer
6 - Player Punch
9 - Last shooting frame (if fire button still held, jump back to first shooting frame instead of frame with this pointer)
14 - Player Pistol shot
17 - Light flash (dim)
22 - Player Shotgun blast
31 - Light flash (bright)
36 - Player Double-Barrel Shotgun blast
38 - Check ammo (If 1 or 0 shells left, skip reloading frames and select different weapon)
39 - Play sound "dbopn"
41 - Play sound "dbload"
43 - Play sound "dbcls"
52 - Player Chaingun shot (check ammo; don't go to -1 ammo, change weapon)
60 - Display firing frame
61 - Player launch rocket
71 - Player use chainsaw
77 - Player fire plasma bullet
84 - Play sound "bfg"
86 - Player fire BFG shot

Monster Code Pointers:

119 - BFG blast effect
127 - Radius explosion: 301
157 - Play pain sound
159 - Plays "PLDETH"
160 - Dead body mode
166 - Play sound "slop"
174 - Wait to wake up
176 - Standard walking code pointer
184 - Turn to face the player's direction
185 - Trooper pistol shot
190 - Play death sound
243 - Archvile walking code pointer (check to resurrect monster)
255 - Play sound "vilatk"
257 - Create archvile flame at target, enable radius explosion for #264
264 - Target jumps in air, takes 10%-20% damage
281 - Play sound "flamest"

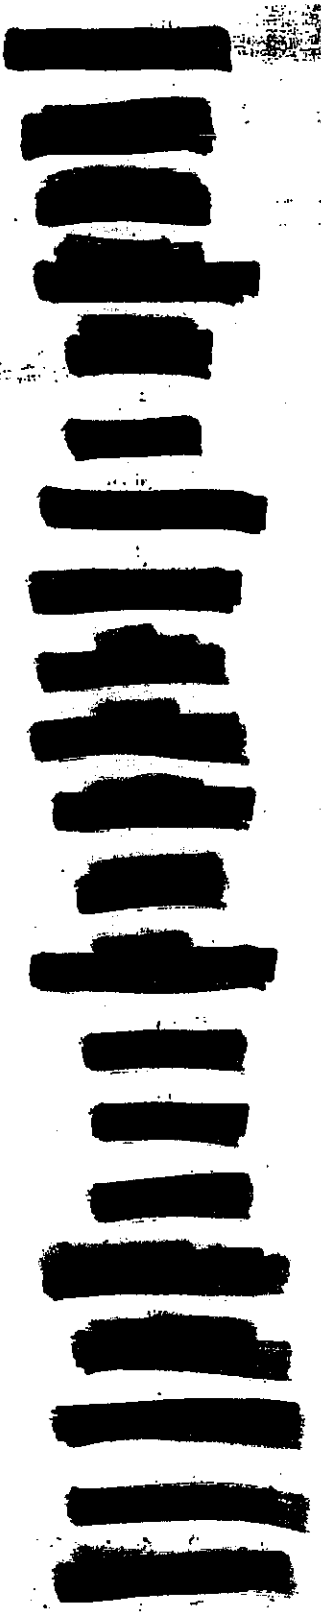
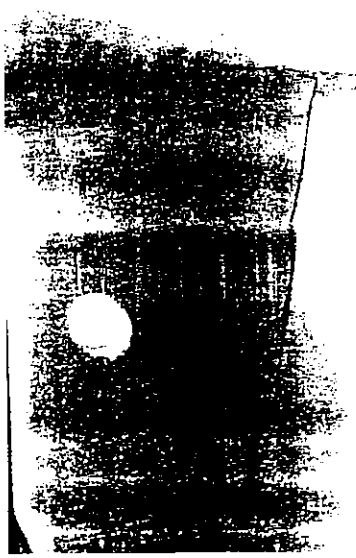
THE SHIT LIST





JC-001-026342

It would be great if god removed all vaccines and warning lables from everything in the world and let natural selection take its course. All the fat ugly retarded crippled dumbass stupid fuckheads in the world would die, and oh fucking well if a few of the good guys die to. Maybe then the human race can actually be proud of itself. World war II is the last time I bet America was proud of its self. We beat the fuck out of the damn zipperheads and the nazis. We came back, from being bombed and loosing major battles to nuke that little piece of shit island and to take over that cool place called Deustchland. I say its cool because I love the German language and "BRUTE" stuff. Kein mitleid fur die merheit. Put everyone in doom I and see who can get past atleast level 1. Actually, then put them into MY worlds. Like Thrasher, Whiskey, UAC Labs, und TIER. I would love to see all you fuckheads die. NBK. I love it! sometime in april me and V will get revenge and will kick natural selection up a few notches. Armed with the following; a terroist bag full of noisey crickets, noisey crickets strapped to WD40 cans, pipe bombs with a shit load of shrapnel, fire bombs, chlorine gas bombs, and smoke bombs. Fire arms we arent sure of yet, hopefully V will have his #3 and plenty of ammo for it. thats another thing, ill fuck around with some shotgun shells for more bombs also. For me, I don't know what weapon ill have. I just want a firearm that can hold lots of bullets and that wont jam on me. So ill need lots of clips to. Ill have those strapped onto my chest. Maybe a bullet proof vest too. We will be in all black. Dusters, black army pants, and we will get custom shirts that say R or V in the background in one big letter and NBK in the front in a smaller font. We will have knifes and blades and backup weaponry all over our bodies, I will have a tattoo of REB on my right arm. Once we start we will wear balaclavas. First we will go to the house of [redacted] and [redacted] in the morning before school starts and before anyone is even awake. We go in, we silently kill each inhabitant and then pin down [redacted] and [redacted] Then take our sweet time pissing on them, spitting on them, and just torturing the hell out of them. Once we are done there we set time bombs to burn the houses down and take any weaponry that we find, who knows we may get lucky. Then get totally prepared and during Alunch we go in and park in our spots. With sunglasses on we start carrying in all of our bags of terrorism and anarchism shit into our table. Being very casual and silent about it. its all for a science/band/english project or something. Then, we sit down, play some pumpup music, light a 50$ stoge, and get ready to start throwing out the first wave of crickets. Then, we light them, and throw them as far as we can, once the first wave starts to go off and the chaos begins, V opens fire and I start lobin the firebombs. Then I open fire and V starts lobin more crickets. Then if we can we go upstairs and go to each classroom we can and pick off fuckers at our will. If we still can we will hijack some awesome car, and drive off to the neighborhood of our choice and start torching houses with molotov cocktails. by that time cops will be all over us and we start to kill them to!we use bombs, fire bombs, and anything we fucking can to kill and damage as much as we fucking can. if it comes to the time when we are trapped with absolutely no way out, we eat crickets along with a ton of chlorine or some other deadly gas. so when we die, so will anyone close to us. if we have figured out the art of time bombs before hand, we will set hundreds of them around houses, roads, bridges, buildings and gas stations. anything that will cause damage and chaos. if you have ever seen the first few clips of violence in INVASION USA youll know what im talkin about. itll be like the LA riots, the oklahoma bombing, WWII, vietnam, duke and doom all mixed together. maybe we will even start a little rebelion or revolution to fuck things up as much as we can. i want to leave a lasting impression on the world. and god damnit do not blame anyone else besides me and V for this. dont blame my family, they had no clue and there is nothing they could have done, they brought me up just fucking fine, dont blame toy stores or any other stores for selling us ammo, bomb materials or anything like that because its not their fault, i dont want no fucking laws on buying fucking PVC

pipes. we are kind of a select case here so dont think this will happen again. dont blame the school, dont fucking put cops all over the place just because we went on a killing spree doesnt mean everyone else will and hardly ever do people bring bombs or guns to school anyway, the admin. is doing a fine job as it is, i dont know who wll be left after we kill but damnit dont change any policies just because of us. it would be stupid and if there is any way in this fucked up universe we can come back as ghosts or what the fuck ever we will haunt the life out of anyone who blames anyone besides me and V. if by some wierd as shit luck my and V survive and escape we will move to some island somewhere or maybe mexico, new zelend or some exotic place where americans cant get us. if there isnt such place, then we will hijack a hell of a lot of bombs and crash a plane into NYC with us inside iring away as we go down. just something to cause more devistation.

Guns in School

I. In the past few weeks there has been news of several shootings in high schools. A student in Texas killed three fellow classmates and injured many more when he fired at a prayer group before school. This student had several other weapons with him when he was apprehended, showing how easy it was to bring so many weapons to school and not be noticed. Students who bring guns to school are hardly ever detected. This is shocking to most parents and even other students since it is just as easy to bring a loaded handgun to school as it is to bring a calculator. The problem of guns in school is a major one faced by many parents, teachers, and citizens these days. Solutions are hard to come by in such a situation because of how widespread the problem is and how different each school in each town can be. Students can get weapons into school too easily and they have to much access to weapons outside of school.

I,

A. Weapons in school are hard to detect and students have ways of getting out of searches or other ways of detection.

1. One example of students avoiding detection is a 1990 survey conducted by the Centers For Disease Control (CDC) which found that one in 20 high school students carried a gun in school during the past month (CDC).
2. Students can use their backpacks, purses, or even projects to bring weapons into school.
3. Metal detectors can be avoided by using other school entrances.

B. Students have access to many weapons and can obtain a gun from many places.

1. The low price of junk guns (as low as 69 dollars) brings these guns within the economic reach of children (Gun Digest, 288).

2. "Junk Guns," also known as Saturday Night Specials, are handguns that are extremely small, inexpensive and typically poorly made (Junk Guns).
    a. The fact that these guns are small and inexpensive implies that these "junk guns" can be found and purchased easily by students.
3. School security experts and law enforcement officials estimate that 80% of the firearms that students bring to school come from home, which shows where most students get their weapons. (Harrington 22).

Guns in schools are a growing problem in today's society. Every day the news broadcasts stories of students shooting students, or going on killing sprees, or even just bringing a gun to school. Students bring guns to school for many reasons. Some for protection, some for attacking, and even some to show off. However, a school is no place for a gun. Solutions for this problem are hard to come by and often too expensive for most schools to even consider, however metal detectors and more police officers are two very good solutions.

Metal detectors posted at entrances in schools can prevent guns from entering schools. That is a given fact. Although, the cost of these machines are rather high and some schools simply can not afford them. Tax payers and donations are other ways to form money to buy detectors, but some tax payers would not be happy with the prices. Several schools in the United States have metal detectors, and shootings still take place in the school. Students can be very resourceful, and can find ways to avoid the detectors. The idea of more police officers is a very good solution. However, this would also cost more money for the tax payers. The end result, in my opinion, is worth every penny spent.

Metal detectors and other forms of detectors are very good solutions. Once installed in all main entrances, students can simply walk through while trained officers can search suspicious

bags and backpacks if the alarm goes off. Students will be much more safe, but the fact of low morale is still present. One problem with metal detectors is that several school-related items are metal and would most likely set off the alarm. This leads to several searches that turn up nothing. This can cause long lines and be a hassle for students trying to get to class.

Police officers can discourage students from bringing weapons and can stop anyone who manages to get a weapon in the school. They are there to protect and serve, so students can go to them if they want to report someone with a gun or any other incident. More cops in schools is a great start to preventing more shootings in schools. On the other hand, the more cops in a school the more it begins to look like a prison. The community does not want it's schools looking like jail houses with the children as the prisoners. They are there to learn and, if students feel uncomfortable, that only leads to more problems. Drop-outs, grades, and student morale would all get worse with the presence of police, even though the cops are there for the students safety. Therefor, only a few cops should be assigned to schools at first. The schools should let the officers and the students get familiar with each other. This familiarity will help the morale of the student body.

More and more we hear of shooting sprees and rampages on the news. Some can be prevented, some can not. Almost any school shooting could have been prevented in some way or another, we just have to spend the necessary time and money to figure out how. Metal detectors and more police officers are only two good solutions. If tax payers can afford to do one or both of these solutions, then that is fantastic. If not, then the community needs to figure out other ways to keep guns out of schools. Students can not learn very well and be motivated if they know that someone in their classroom has a gun with them. In conclusion, metal detectors and more police officers are a great start to the fight against guns in school.

Stupid cars." like that. now. what flaming part if any would a normal human being believe? And thats just one person!! Another BIG example is Brooks Brown(303-972-0602). Now, according to him, he has a 215 IQ, 5 other homes (2 in alaska, and 3 in Florida), 95mph fast ball(he is only 16), runs a mile in about 5 minutes, has an uncle thats the former head of all the armed forces and has access to.....Theee Button..., his other uncle is a multi-millionare that lives in downtown detroit, and his neighbors are the chick that sang "r.e.s.p.e.c.t." and the lead singer of Aerosmith. And that same uncle owns 30%

of the stock of that tylenol company, And his grandparents gives..GIVES...him about 1000 dollars for each month, and his other Grandpa can blow up every house in America because all the houses have C-4 in the foundations. Again, according to Brook Brown. OK, when people lie like that, its not impressive, noone believes it, it sounds just plain stupid, and its a friggin waste of my time.
